For me basketball means peace. Even if I have all my troubles, they all go away when I play basketball. Today's tournament was a lot of fun, first of all, I would like to thank BİDEV for organizing it and the people who came forward with their contributions. It was a lot of fun. Thank you very much.

**I have been playing basketball for 3 years. I have been playing basketball for a year and a half as a licensed basketball player in Bayrampaşa BilgiKulübü. Although basketball is a lifestyle for me, its contribution to my physical and mental development is endless. I love playing basketball very much. Playing basketball on the street, in practice, in the neighborhood makes me very happy. And if I have friends, if I play with my friends, I am even happier and enjoy it more. We had a lot of fun in the 3-on-3 matches in the nice organization organized by BİDEV. 2 of my friends and I had very nice basketball matches. We enjoyed the 3 on 3 matches organized by BİDEV very much. We wish BİDEV to organize more of these matches. Have a good day, see you.**

**I have been playing basketball since I was 6 years old. I have been a licensed player of Bayrampaşa Bilgi Sports Club for the last one and a half years. I feel very happy when I play basketball. I feel peaceful on the basketball court, when I hold the basketball, when I play basketball with my friends, in practice, in the match, in the locker room, in all places and concepts related to basketball. My idol in basketball is Kobe Braynt. Because I love his style of play, the way he plays, his determination, his hard work, his achievements. And that's why I find Kobe Braynt as my idol. I feel very lucky to have participated in BİDEV's 3x3 tournament. I am very, very happy for the experience I gained in the matches I played in BİDEV's 3x3 tournament. I would like to thank all our teachers, coaches and everyone who contributed to BİDEV and wish you a healthy day. Take care of yourselves.**

**First of all, I can say that basketball is a sport that, like all others, builds you physically, builds you emotionally, your character, disciplines you, makes you more ambitious to achieve success. But the moments you experience together with the team, the cohesion you create, the way you learn to give something irreplaceable, and as you learn to give, so you understand what it's like to receive.**

**For me, the most important lesson that basketball taught me is the outlook on life, because maybe if I hadn't been involved in it, I wouldn't have realized that by practicing it, I understand that there are no limits for anything, there are no impossible things.**

**I told myself that no matter what I look like, what I can and can't do, it doesn't matter at all when I have absolutely one hundred percent desire and I shouldn't let my worries distract me from my own desires. That is why I am truly grateful to basketball for teaching me to live in the most correct way for me.**

**Hello, I'm Anton Fikov, 21 years old and a professional wheelchair basketball player. Basketball has helped me become much more decisive and confident in my decision-making, both on the court and in life. It also helped me believe in my dreams and follow them hard and have a plan to achieve the goals I set. Basketball has given me many friendships and good experiences, every basket and every victory gives me a great emotion.**

**I want to tell you why I practice wheelchair basketball and what this sport has taught me. I practice basketball because it gives me energy, it makes me feel alive, I love that feeling when I enter the gym. I learned from basketball - discipline, perseverance, responsibility. In this sport, if you don't have those things, you won't succeed.**
